

# dehydrated alfalfa pellets

FIRST quality

## Characteristics

This is a pelleted product obtained through the grinding and pelleting of alfalfa. It is ideal for direct consumption by livestock or as part of compound feed formulations. This product offers advantages in terms of protein contribution, feed efficiency, and transport cost.

Recommended for

## Quality

PHYSICO-CHEMICAL CHARACTERISTICS

MICROBIOLOGICAL PARAMETERS

	FIRST
Protein	≥ 16%
Moisture	11% max
Size	5 - 6 mm
ADF	$31,5\% \leq X \leq 36,5\%$
NDF	$46\% \leq X \leq 52\%$
Aflatoxin B1	5 ppb max. (ug/kg)
Mold	Below legislation

## Transport

- In Bulk
- Big bag (1,000 kg)
- Small bag (25 kg)
- In containers

## Shelf life and traceability

Preferably consume within 24 months from the batch date or from the label indicating its traceability.

## Storage

Store in a clean area, away from hazardous environments. Keep in a dry place, protected from direct sunlight.
